

Les Couleurs® Le Corbusier.

17

Masterpiece

Le Corbusier is considered to be one of the most significant architects of the 20th century. The colour scheme of buildings and the effect of colour were just as important for him as the layout or the form. And so he created a colour system over decades that is still unique to date.

Polychromie Le Corbusier

The "polychromie architecturale" is based on the artistic selection of pigments and the repetition of a few primary colours. All 63 colours are natural colours and as such are consistently harmonious. Every colour can be harmoniously combined with any other colour in the system.

This distinguishes the "polychromie architecturale" from other colour systems. Thus, it is a unique tool. "Cross-trade" holistic interior design can also be implemented.

Doctrine of harmony

Due to the notable flexibility and the unique depth of colour, this palette of colours remains an inspiration to this day.

Exclusively throughout the world, JUNG is providing the classic switch LS 990 in the Les Couleurs® Le Corbusier colours. The switches are painted by hand in a special process to project the depth of colour.

Colour scheme

Individual accent or continuous colour concept:
LS 990 in Les Couleurs® Le Corbusier makes unique
statements.

ROTARY DIMMER

2-GANG SWITCH

KNX PUSH-BUTTON SENSOR

SCHUKO® SOCKET

Form perfected

As well as conventional switches, sockets or dimmers, controls are also integrated in the unique colour system for the control of room functions. The Smart Home can thus also be realised in Les Couleurs® Le Corbusier.

32110 l'ocre rouge			

The delivery time for approved colours is six to eight weeks.
The delivery time for made-to-order production is eight to twelve weeks.

Flowing transition

Puristic layout is increasingly gaining acceptance in modern interior design. With LS ZERO in Les Couleurs® Le Corbusier, the hand-painted switches can be installed flush in furniture, brickwork and dry wall construction. Thus design achieves a completely new architectural quality.

Interaction

Giving rooms the desired atmosphere by using the appropriate colour combinations is a true art. The high quality products of the Les Couleurs network partners guarantee absolute colour matching. The "polychromie architecturale" is thus the comprehensive tool for architectural colour design.
